Hiring Team

Hiring Manager

DELOITTE

Hyderabad, Telangana, India

Dear Hiring Team,

I am writing to express my strong interest in the Analyst position within the Software Engineering team at ITS Canada, as advertised on [source of job posting]. With a solid background in software development, a passion for emerging technologies, and a dedication to delivering high-quality solutions, I am confident in my ability to contribute to your organization's success.

Deloitte has always been my dream company, situated on my route to college. I have often looked up to the Deloitte building and envisioned myself working there, fully immersed in the exciting world of technology and innovation. This opportunity presents the perfect moment for me to turn that dream into reality. I am 100% committed to giving my utmost dedication, enthusiasm, and perseverance to contribute to Deloitte's mission and growth.

In preparation for this application, I have conducted extensive research on Deloitte through various sources, including Google and LinkedIn. I have thoroughly familiarized myself with the company's values, projects, and culture. Additionally, I have personally reached out to Deloitte employees on LinkedIn to gain insights into their experiences and learn more about the company's work environment. These efforts have further solidified my belief that Deloitte is the ideal place for me to develop my skills and make a meaningful impact.

I am eager to learn and adapt to new knowledge and skills that are relevant to the job role and aligned with the values of Deloitte. I firmly believe that my technical aptitude, combined with my strong work ethic and passion for continuous learning, will enable me to excel in delivering exceptional results and driving innovation within the Software Engineering team.

Throughout my academic journey and professional experiences, I have developed a robust foundation in software development, analytics, and IT infrastructure. My recent role as an R&D Intern at One Oath Educational Research and Technologies Pvt Ltd. allowed me to implement cutting-edge educational methods and leverage AI to transform the learning experience. I worked collaboratively with cross-functional teams, conducted data analysis, and contributed to collaborative product development initiatives.

Additionally, during my Web Application Development Internship at Manac Infotech Pvt Ltd, I acquired hands-on experience in developing responsive web applications and optimizing performance. By closely collaborating with product management teams, I delivered user-centric solutions that enhanced the overall customer experience.

With a Bachelor of Technology degree in Computer Science Engineering from GITAM University, I have gained a strong academic foundation in AI, DBMS, Machine Learning, and other relevant coursework. I am excited about the prospect of joining ITS Canada and contributing to your innovative projects, leveraging cutting-edge technologies such as Microsoft, ServiceNow, ERP, SAP HANA, Big Data, and Analytics.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills, passion, and dream of working at Deloitte align with the requirements of the Analyst position. Please find attached my resume for your review, and I am available at your convenience for an interview.

Thank you for your time and consideration.

Sincerely,

Badri Nadh Akula
